

TASK 1 – DATASET SELECTION & IMPORT

The screenshot shows the Power BI desktop application interface. At the top, there are three main panes: 'Filters', 'Visualizations', and 'Data'. The 'Filters' pane on the left contains search fields for 'Search' and 'Add data fields here', along with sections for 'Filters on this page' and 'Filters on all pages', each with a 'Add data fields here' button. The 'Visualizations' pane in the center displays a grid of visualization icons, including various charts and tables. The 'Data' pane on the right also has a search field and lists three datasets: 'List of Orders', 'Order Details', and 'Sales target'. Below these panes is a large workspace area with a title 'Build visuals with your data' and a sub-instruction 'Select or drag fields from the Data pane onto the report canvas.' A small preview of a visual is shown in the workspace. At the bottom, there is a navigation bar with icons for 'File', 'Home', 'Report', 'Page', 'Page 1', and a '+' button.
